

# Fleet management for non-profit organizations

Verizon Connect can help non-profit organizations manage their vehicles and coach their drivers to help improve safety and increase visibility.

## Organizations that serve the needs of their communities can help improve accountability and level of service through fleet tracking.

Verizon Connect offers fleet management solutions to give these groups tools to better manage operating expenses, improve visibility into worker activities, and validate services performed.

**“ People managing programs for the community need to know where the vehicles are...if it’s an emergency response they can see what resources are responding to that event.”**

-Dan Sunseri, Fleet Manager, City of San Jose, CA

### Key features

- See vehicles on a live map
- View historical date/time and location of all vehicles
- Track fuel use and vehicle maintenance
- Monitor driver behaviors, like hard braking, idling or speeding
- Get alerted of unauthorized vehicle use or movement

### Top benefits

- Verify services provided for patients or residents
- Manage vehicle maintenance and help reduce downtime
- Help reduce idling to better control fuel expenses
- Help coach workers on better driving behaviors
